INTRODUCTION

LANDSPIDER TIRE INC., headquartered in California, is a tire company focusing on the American market. LANDSPIDER TIRE develops products on the basis of the needs of the American market and customers. Since the establishment of the company, we insist on providing the products of high-quality for the market and the best service for customers. After several years of operation, Our dealers almost cover all the states of the US, LandSpider has become one of the most professional tire suppliers in the US market.

Why choose LandSpider?

- Specifically for the American market

LandSpider was developed specifically for the US market to meet almost all needs of customers.

- Constantly updated product line

In order to meet the changing market needs, LandSpider updates and improves the product series on the basis of the market and customer feedback every year. Furthermore, we could customize exclusive products for customers.

- 4.0 smart plant industry

Advanced industrial 4.0 production ensures high-quality products.

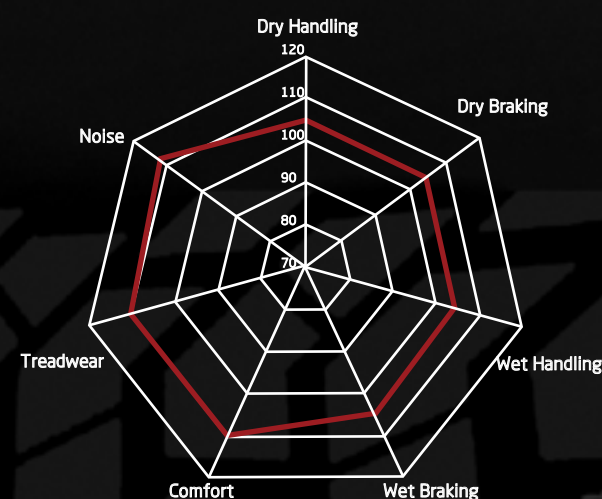

- Excellent after-sales service

LANDSPIDER TIRE INC. has strong after-sales team with professional technical personnel. We train and assess the after-sales team regularly to help customers solve the problems in a timely manner.

PERFORMANCE TEST

With the optimized pitch-alignment by simulation, the noise band is tended to be evenly dispersed into a wider frequency range for a quieter driving.

High siping density design increases braking and wet grip performance; Interlocking grooves and sipes design prevents warping effect while braking, provides even distribution on the pressure against road.

Four main longitudinal grooves combined with high density lateral sipes improves water evacuation for excellent resistance to hydroplaning.

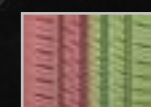

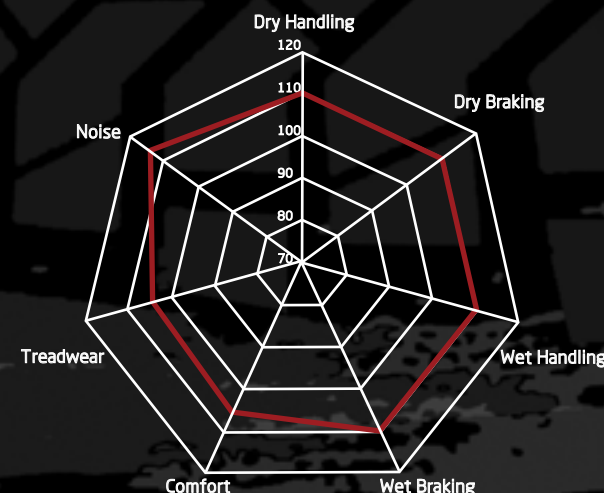

Stimulation optimization produces impressive traction in dry condition along with extreme wet grip performance.

PERFORMANCE TEST

Asymmetric pattern design provides water evacuation ability for the inner side, while the big blocks for the outer side produce precise steering with impressive cornering stability.

With the optimized pitch-alignment by simulation, the noise band is tended to be evenly dispersed into a wider frequency range for a quieter driving.

High density sipe design provides more road contact with improved braking capability and wet grip; Zigzag sipe design provides comfort and stable ride experience.

Strong outer shoulder with chamfered tread blocks reduces distortion in the tread when cornering in high speed; with stimulation optimized tread stiffness, it produces more steering precision and stability in high speed.

PERFORMANCE TEST

Multi-pitch optimized combination design allows a evenly dispersing of the noise into a wider frequency range, which produces a more quiet and comfortable ride experience.

High density sipe design provides more road contact with improved braking capability and wet grip; Interlocking grooves and sipes design prevents warping effects while braking, effectively shorten braking distance.

Bionic claw-shape design provides extra grip on mud and loose soil; the thick sidewall shield and specialized compound helps guard against sharp objects from any angle approaching.

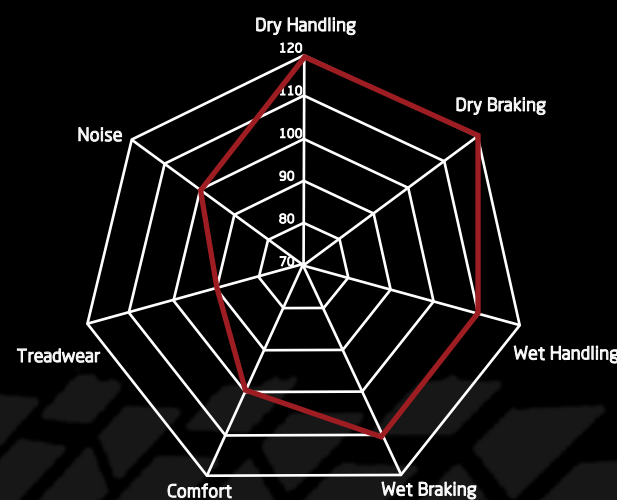

With stronger shoulder with chamfered tread blocks, it reduces distortion when cornering in high speed, while produces more steering precision and stability in high speed.

275/40ZR18 103WXL	BSW	7.4	9.3

PERFORMANCE TEST

Asymmetric pattern design meets different requirements for both inside and outside of the tread. The outer pattern provides strong grip, while the inner pattern improves drainage.

The large tread pattern blocks on the outer tire ensure stability and balance control during cornering.

Wider longitudinal grooves and more lateral branches enhance driving traction on wetlands.

Jointless Nylon band and strong structure design provided the strong carcass to enhance the reliability and durability.

PERFORMANCE TEST

Large tread blocks with biting edge provides traction in a variety of conditions. Multi-directional grooves and sipes design creates better traction in any direction.

High density sipes design produces a better performance on water evacuation and constant grip with better traction.

The strengthening bar design control system produces better handling performance with long treadwear life.

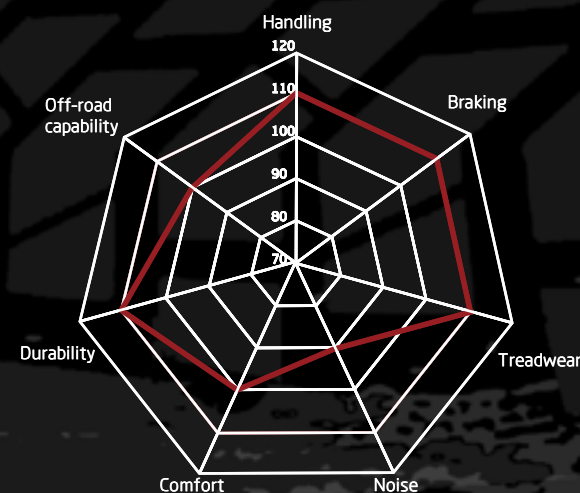

Bionic claw-shape design provides extra grip on mud and loose soil; the thick sidewall shield and specialized compound helps guard against sharp objects from any angle approaching.

PERFORMANCE TEST

The all-season tyre features interlocking blocks and grooves for powerful off-road traction and on-road driving smoothness.

Deep sipes evenly and logically are distributed on the tread surface with stone ejector designs to greatly improve grip on wet conditions.

A cut-and-chip resistant compound with strong internal structure engineering is utilized for enhanced durability in rough conditions, with alternating open shoulders providing additional biting edges for superior traction on all terrains.

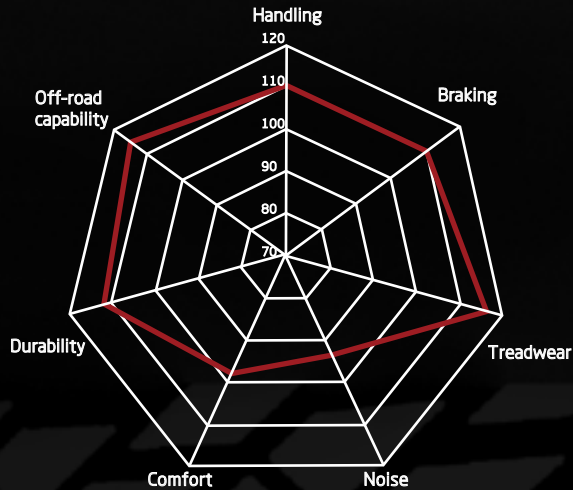

State-of-art and robust sidewall shield designs effectively protect the core, while an advanced deflection design prevents objects from snagging and splitting the sidewall, even on the toughest terrain.

PERFORMANCE TEST

Open type pattern provides a quiet and smooth ride on the highway, the Ridge Grappler's alternating grooves and biting edges offer drivers added traction.

The high void ratio between the tread blocks efficiently clears mud and dirt from the tread, provides excellent traction in extreme terrain.

Angled, lateral voids were engineered to channel away stones and provide forward stability in dry conditions.

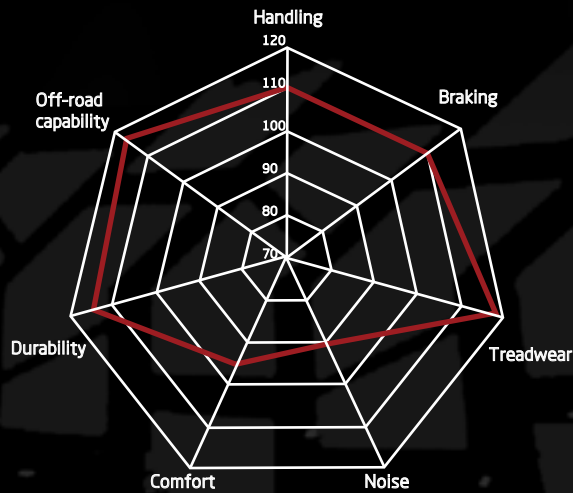

Strong shoulder design provides additional off-road grip and protects the sidewall by bouncing protruding objects. Helps prevent sidewall splitting.

PERFORMANCE TEST

The bold aggressive design with large tread blocks provides more contact area, the block-chain control system produces better handling performance with quiet and comfortable ride experience.

Highly angled center tread blocks enhance traction and lateral stability while reducing road noise.

Self-cleaning grooves design ensures good aquaplaning resistance and reducing tire damage by hindering stones from getting caught.

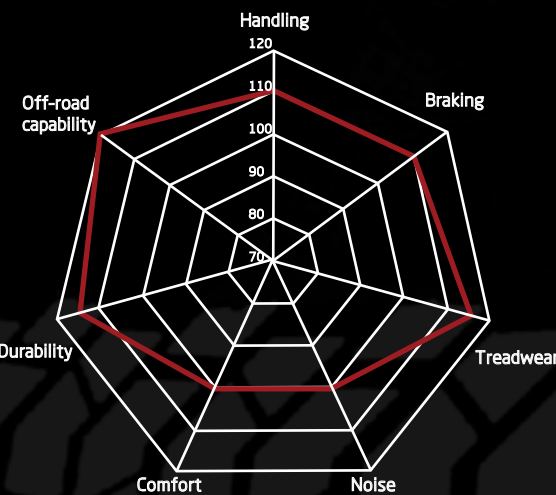

With alternating convex and concave sipes on the tread blocks and bionic claw-shape design, it provides extra grip on mud and loose soil; the thick sidewall shield and specialized compound helps guard against any sharp objects.

ROCKTRAXX M/T

The ROCKTRAXX M/T features an innovative design to deliver versatile mud terrain performance, providing excellent traction both on and off-road. The tread pattern design in BBDT® theory and 3-Ply internal engineering provide off-road performance, quick steering response, and stability.

Sizes Description	PLY	Sidewall Description	Tread Depth MM 1/32"
37x12.50R17LT 128Q	8PR/LRD	RBL	15.5 19.5

PERFORMANCE TEST

Striking and unique looking large side-lugs design enhances traction effectively in the toughest terrains.

Optimized block/void ratio based on M-theory for excellent with high frequency biting edges and surfaces.

Mud-stone ejector design and deep siping to increase 4-season performance, especially on wet, sludge, or sandy conditions.

Specialized tread compound for M/T and high-dispersion mixing process for excellent off-road performance and tread-wearing durability.
