WINDFORCE

ENJOY YOUR TRIPS WITH WINDFORCE TYRES

TIRE CATALOGUE 2024-2025

INTRODUCTION

WINDFORCE brand was established in 2012, through unremitting team efforts and innovation, WINDFORCE has developed over 1200 tire sizes covering PCR, UHP, SUV, 4X4, VAN, WINTER, ALL SEASON, as well as RACING Tires.

WINDFORCE brand also has over 120 sizes for its TBR Tires with full ranges covering steer, drive, trailer and all position wheel.

In line with the vision of “building a professional tire brand” , WINDFORCE has obtained various certificates including ISO9001, China CCC, US DOT, EU E-MARK, EU Regulation 117, Saudi Arabia SASO, Nigeria SONCAP, Uruguay LATU, India BIS, Brazil INMENTRO, etc....

With the spirit of customer first, WINDFORCE has become a reliable brand focusing on quality products, and will continuously enhance its excellent services to all partners by our dedicated sales team.

No adventure without risk, no driving without safeguarding. On the way to the future, WINDFORCE is always around you.

RANGE:
12-16

SPEED RATE:
H/T/V

ASPECT RATIO:
45-80

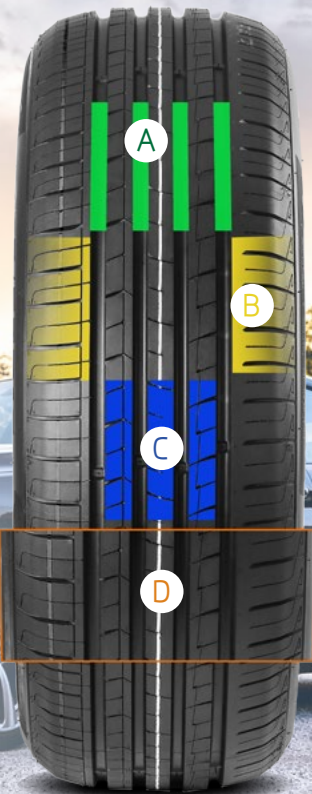

SECTION WIDTH:
145-235

A Four wide circumferential tread grooves and lateral grooves with fine sipes provide efficient water evacuation, outstanding wet performance.

B Continuous outside tread blocks enhance excellent performance and precise control when cornering at high speed. The special rib segment design optimize contact pressure distribution, improve road contact area and provide precise control. The serrated groove walls absorb noise and deliver a quieter ride.

C Continuous block patterns on shoulder enhance the ride stability at high speed cornering. The rim protector will protect wheels from curb damage.

D Special tread compound delivers excellent grip on both dry and wet roads and reduce the rolling resistance to save oil and protect environment.

A Four wide circumferential tread grooves and lateral grooves with fine sipes provide efficient water evacuation, outstanding wet performance.

B Continuous outside tread blocks enhance excellent performance and precise control when cornering at high speed. The special rib segment design optimize contact pressure distribution, improve road contact area and provide precise control. The serrated groove walls absorb noise and deliver a quieter ride.

C The state-of-art asymmetric design on the inner and outer sides breaks traditional rules , improves the freedom of tire mounting.

D Special tread compound delivers excellent grip on both dry and wet roads and reduce the rolling resistance to save oil and protect environment.

A Four straight & semizigzag longitudinal tread grooves deliver the reduced ground resistance to enable a smoother flow over water and snow and ensure better wet and snow traction performance.

B Continuous solid center ribs and lateral tread blocks connected by rib-in-chain enhance steering stability. The application of summer and winter sipes allow the tire to process the nice all season capabilities.

C The asymmetric pattern with multi- performance harmony for total balanced all season driving. The open shoulder grooves prevent aquaplaning with excellent wet grip and water evacuation.

D The high grip silica compound offers the best snow/wet traction and the lowest rolling resistance.

A 2 wide tread grooves with fine sipes enhance steering and controlling ability.

B Serrated snow patterns with fine sipes provide great grip under snow & ice conditions.

C With its combination of open shoulders for superb aquaplaning performance and stiff pattern you'll stay in control all year round.

D Outstanding driving efficiency and superb mileage.

- A All-season tyre designed for all conditions.
- B Excellent in dry braking and wet grip for safety.
- C Traction on difficult surfaces such as mud, grass, gravel and snow (3PMSF).
- D The best in terms of longevity, built with reinforced robustness to withstand wear and tear.

- A** Four wide circumferential tread grooves deliver the ride stability and offer excellent performance on wet conditions. Improved grooves and bead profile design offer better ride stability, endurance and handling performance.
- B** The open shoulder grooves prevent aquaplaning with enhanced wet grip performance and provide excellent water evacuation. Continuous tread blocks on both shoulder give great support to enhance the ride stability when cornering.
- C** Variable pitch pattern and solid center ribs improve the ride stability, reduce the noise and deliver a comfortable ride.
- D** High-density sipes with special compound deliver a smooth ride and improve traction on dry and wet roads. Jointless Nylon band and strong structure design provided the strong carcass to enhance the reliability and durability.

ADVANFORS A/T

UTQG: 500 A A

Only for P series

ALL TERRAIN

The ADVANFORS A/T is an all-season tire for SUV and CUV owners, and is an all terrain tire specifically designed for road and off-road use.

Performance icons

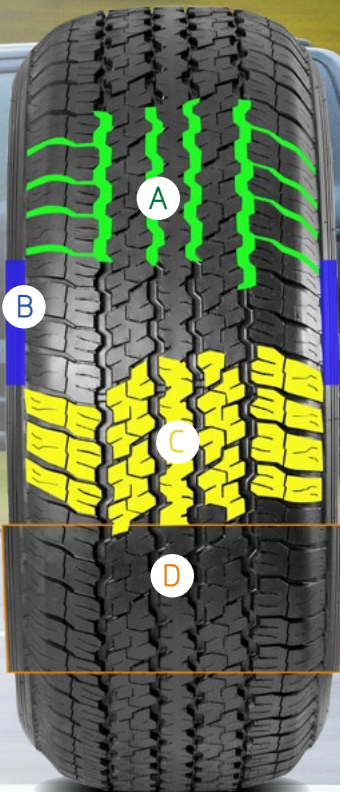

RANGE:
16-18

SPEED RATE:
H/R/S/T/V

ASPECT RATIO:
60-80

SECTION WIDTH:
205-285

- A** The unique symmetrical tread pattern design provides smooth driving performance on highways and urban roads, improving ride comfort. The ultra wide grounding surface greatly enhances the driving range in harsh road conditions.
- B** The anti abrasion layer design on the sidewall provides additional protection against many common dangers in harsh off-road conditions.
- C** The irregular distribution of sipes and various pitch alignment significantly reduces tire noise.
- D** The special silicon dioxide tread composite material not only greatly improves the performance of braking, turning, and handling. It also reduces rolling resistance, thereby improving fuel economy.

- A** Four main zigzag grooves and rough lateral blocks provide excellent traction on all kinds of road conditions.
- B** The open shoulder grooves prevent aquaplaning with enhanced wet grip performance and provide excellent water evacuation. The white letter styling provide a artistic image.
- C** The block tread design with multiple-sipes provide outstanding off-road traction and reduce tread damage on off-road condition.
- D** Jointless Nylon band and strong structure design provided the strong carcass to enhance the reliability and durability. Special tread compound and wide footprint enhance tread life and deliver excellent braking on wet and dry roads.

- A** Three main zigzag grooves combined with lateral blocks provide excellent ride stability and great traction on all kinds of road conditions.
- B** Continuous tread patterns on shoulder and solid shoulder ribs provide responsive handling and even wear.
- C** Variable pitch patterns and multiknife-cut tread pattern reduce vibration to offer the comfort and quiet ride.
- D** Reinforced structure and special abrasion-resistant tread compound deliver extra puncture resistance and load bearing capability with more mileage.

A Central across & 2 wide straight circumferential grooves, with the design of convexes in the bottom, improve the traction, shorten braking distance and increase the stability on the snow road.

B Bionic tread pattern design makes the whole tread blocks' stiffness more logical, with the optimized deployment of "V" shape sipes, provide great grip on snow & ice conditions.

C Wide rolling tread, by using computer-optimized design, make sure enough contact area for more grip. The wide open shoulder grooves prevent aquaplaning with enhanced wet grip and provide excellent water & snow evacuation.

D Special tread compound remains flexible at lower temperatures to make sure the grip on winter road conditions and reduce the rolling resistance.

H/V

ASPECT RATIO:
35-60

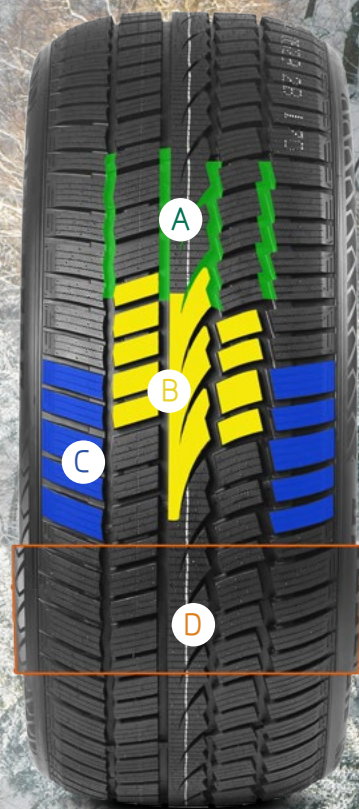

SECTION WIDTH:
185-315

A Four wide circumferential tread grooves and lateral grooves with fine sipes provide efficient water evacuation, outstanding wet performance.

B Continuous outside tread blocks enhance excellent performance and precise control when cornering at high speed. The special rib segment design optimize contact pressure distribution, improve road contact area and provide precise control.

C Continuous block patterns on shoulder enhance the ride stability at high speed cornering. The rim protector will protect wheels from curb damage.

D Special tread compound remains flexible at lower temperatures to make sure the grip on winter road conditions and reduce the rolling resistance.

- A** Central straight & 2 wide Zig-Zag circumferential blocks, with the design of convexes in the bottom, improve the traction, shorten braking distance and increase the stability on the snow road.
- B** Wide rolling tread, by using computeroptimized design, make sure enough contact area for more grip. The wide open shoulder grooves prevent aquaplaning with enhanced wet grip and provide excellent water & snow evacuation.
- C** Bionic tread pattern design makes rge whole tread blocks' stiffness more logical, with the optimized deployment of "Z" shape sipes, provide great grip on snow & ice conditions.
- D** Special tread compound remains flexible at lower temperatures to make sure the grip on winter road conditions and reduce the rolling resistance.

- A

Dedicated, special designed studs for the middle tread and independent studs for shoulder areas, providing excellent longitudinal grip, the grip and handling performance on icy and snowy surfaces are strengthened greatly!
- B

The wide lateral grooves provide more sharp edges that can improve the traction and grip on snow, shorten the braking distance with power.
- C

3D sipes improve performance on snow and ice surface with its maximized actual contact area under deflection and edge effect without losing block stiffness.
- D

Special tread compound remains flexible at lower temperatures to make sure the grip on winter road conditions.
